Smile with Style

Renew your smile and rediscover confidence with the **SMILE INC MAKEOVER** by **DR ERNEST REX TAN**, Founder and Director of **SMILE INC DENTAL SURGEONS**

Your face is your fortune, and a healthy, confident smile plays a big part. If you've been plagued with problematic teeth which have caused you to lose the sparkle from your smile, there is hope again. Getting that perfect smile is now possible with the Smile Inc Makeover, a multi-step approach by Smile Inc Dental Surgeons to help you rediscover the beauty of an unblemished smile.

An established name in the dental industry in Singapore, Smile Inc Dental Surgeons was the first dental practice in Singapore and Asia (outside Japan) to offer the revolutionary Britesmile Laser Teeth Whitening technology since 1997. Helmed by renowned cosmetic dental surgeon, Dr Ernest Rex Tan, a Specialist in Prosthodontics, Smile Inc believes that no set of teeth is beyond repair, and is committed to helping you refine your smile to perfection – be it removing unsightly stains to correcting irregular, chipped or crooked teeth.

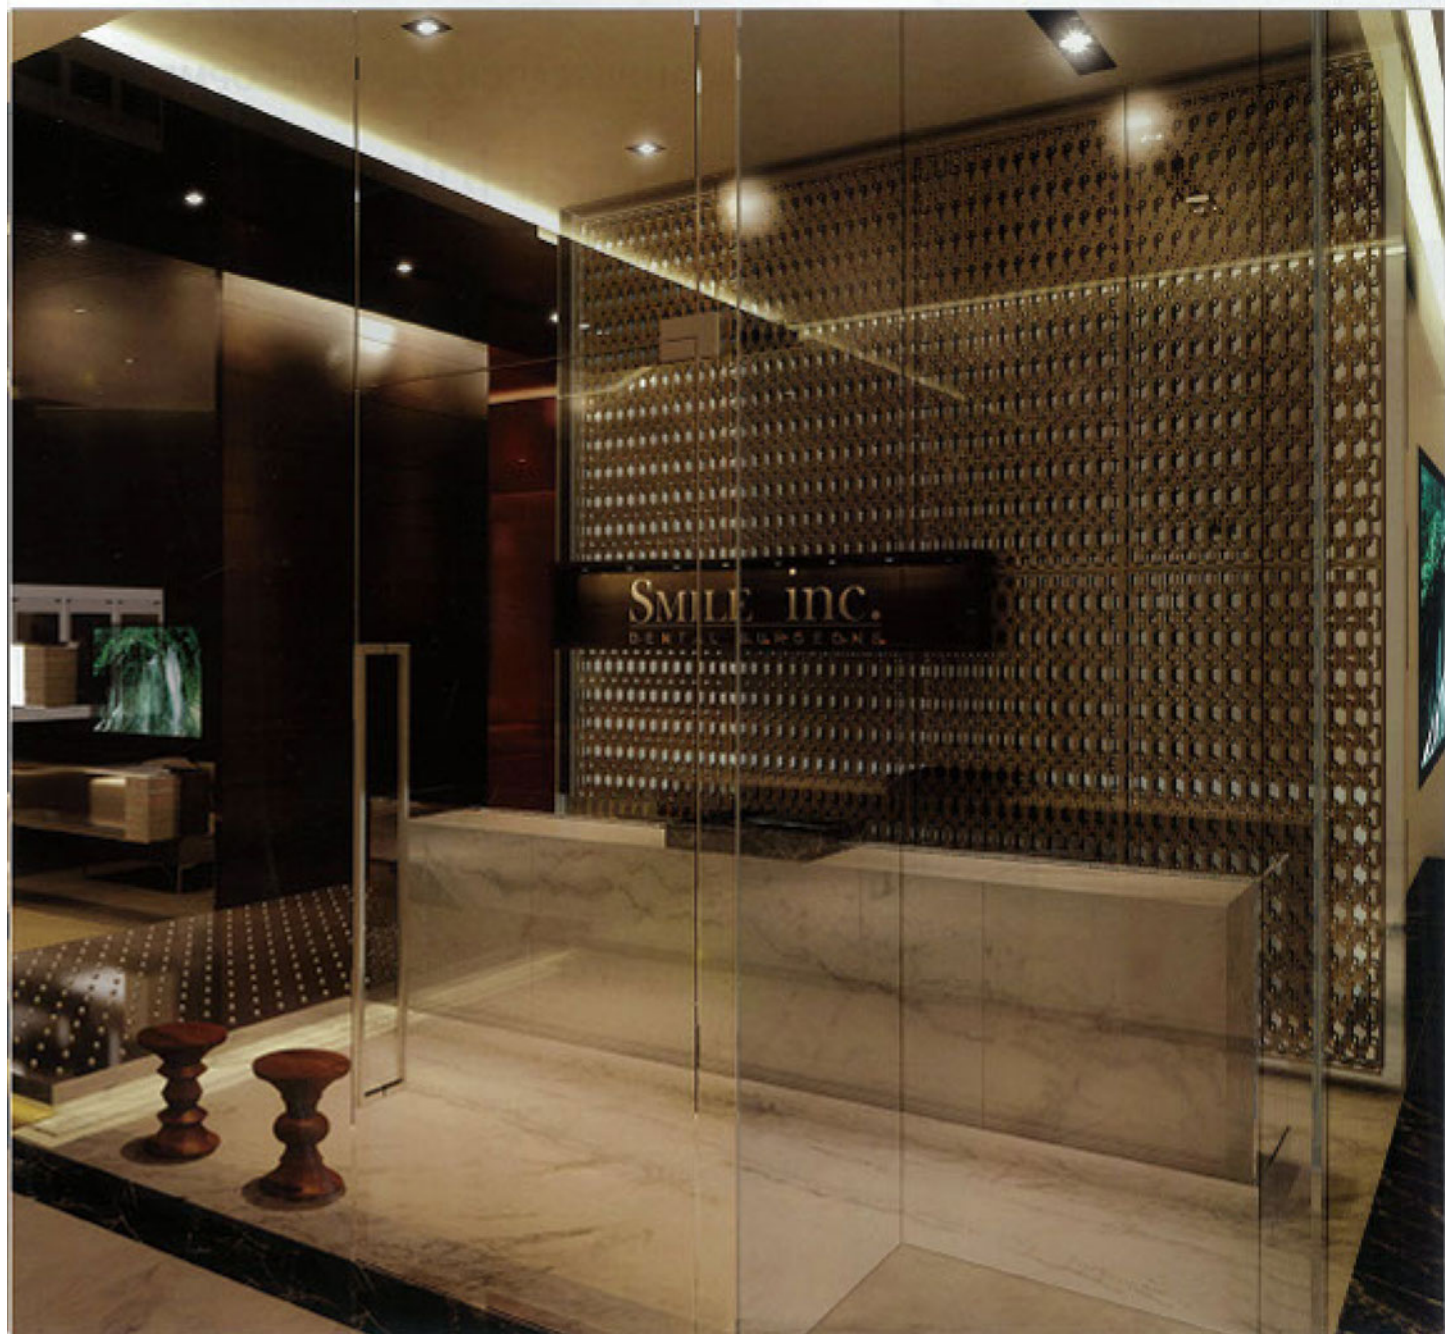

Even a collapsed smile line is not beyond help – Dr Tan specialises in re-contouring gummy smiles and closing gaps between badly

spaced teeth, whitening, reshaping as well as replacing missing teeth.

In consultation with Dr Tan, you can bring multiple aesthetic concerns to the table and your dental needs will be addressed simultaneously in a holistic approach. Factors such as age, gender, facial shape, skin tone and the patient's personal preferences and personality are also taken into consideration. No single solution will work for everyone, as each individual is unique. Hence, Dr Tan carefully considers every aspect before customising a suite of cosmetic dental techniques specifically for you.

The signature Smile Inc Makeover employs several key features:

1. LASER TEETH WHITENING With Smile Inc's Laser Teeth Whitening technology, your smile can be dramatically brightened in just one

hour – with no surgery or downtime. Its effectiveness in removing both external and intrinsic stains while leaving the enamel intact is proof that this Laser Teeth Whitening system surpasses other light-based whitening systems in the market.

2. INSTANT BRACES For those whose crooked teeth have caused them much chagrin, Instant Braces means that a whole new beautiful smile that is well aligned can be created in as little as one to two visits, compared to years of wearing traditional braces. The results are certain and there are no relapses. No surgery or extractions are required, so you can say goodbye to crooked or mal-aligned teeth!

3. THE SMILE LIFT If your smile needs an extra boost due to insufficient support of the lips or cheeks, or teeth have simply worn down over the years, The Smile Lift enhances and lifts

the corners of your lips to achieve a younger and fuller smile. Dark corridors at the cheeks are given greater support to achieve the desired fullness and take years off your look.

Give yourself a Smile Inc Makeover today, so you can boldly exude confidence with a smile you'll be proud of. Knowing Smile Inc can take care of all your dental needs means there really is a reason for you to smile again! ■
